

June 28, 2020

Hello Badger Families:

In late March, I began a Water Tap Watch Campaign with our Badger Elementary School Community. The campaign's goal was to improve the overall health and well-being of our learning community by replacing our old, rundown water fountains with new "Water Filtered Filling Stations" at Badger Elementary School. I set our sights on a lofty goal of replacing each of the six water fountains we had at Badger! Over the past few months, we had approximately 30 donations that were provided toward this campaign. Thank you to each of those families for their generosity toward our goal. We fell a little short of our overall goal of raising \$11,000.00 to complete the entire project. However, as my last gesture to a school that I love, I am going to write a personal check to cover the remaining balance so we can complete this important project. I'm happy to do this for the students and staff that I care deeply about. Plus, it gives me a reason to come back next year and visit! Therefore, all six new Water Filtered Filling Stations should arrive in the near future, and they are scheduled to be installed prior to the beginning of 2020-21 school year. Ultimately, these new water stations will provide our students and staff fresh, safe, filtered water on a daily basis. Fresh drinking water will benefit the overall health and well-being of our entire school community. Thank you to everyone who assisted in making this project a reality. Together, we were again able to do something very special for our learning community. Hooray, Badger Bulldogs!

**Sincerely,
Tim Hopfensperger**
